At its meeting held today, February 9, 2015, the Management Board of AMAG Austria Metall AG resolved to propose to the Shareholders' Meeting a dividend in the amount of EUR 1.20 per share. Related to the average stock price in 2014, this translates to a dividend yield of 4.8%.

The basis for this decision was a successful inventory optimization program. Metal inventories were reduced by 20% compared to the prior year by consistent management. This strategy resulted in a substantial capital release.
