^{*)} The comparable values shown for the year 2010 refer to AMAG Holding GmbH and its subsidiaries

¹⁾ Inventories, trade receivables, trade payables (without trade payables for investments)

²⁾ Annual average of equity, interest-bearing financial liabilities, cash and cash equivalents

³⁾ Interest-bearing financial liabilities, plus non-interest bearing loan (Canada), minus cash and cash equivalents

⁴⁾ Average full time equivalent including leasing personnel, without apprentices

The employees of the 20 % participation in smelter Alouette (approx. 200 employees) are not included

1st to 3rd quarters 2011 – highlights

- Operative business development continues its positive trend in all three divisions in the third quarter of 2011. Order backlog remains satisfactory.
- Increase in sales by 15 % as compared with the comparable period of the prior year.
- Increase in EBIT by +22 % as compared with the comparable period of 2010, to 90.7 mEUR.
- Increase of cash flow from operating activities by 17 % to 77.3 mEUR from 66.3 mEUR generated in the first three quarters of 2010.
- Sound balance-sheet structure with an equity ratio of 57 % and low net financial debt of 23.8 mEUR as of the end of September 2011.
- Positive outlook for the fiscal year of 2011 confirmed.

Dear Stockholders:

AMAG's operative development in the third quarter of 2011 was encouraging yet again. Traditionally, however, the quarter under review tends to be slightly weaker compared to the previous quarter due to seasonal effects such as maintenance work and the resulting reduced number of working days. These factors and negative valuation effects have been at the root of a decline in earnings before interest, taxes, depreciation and amortization (EBITDA) in the third quarter of 2011 in the rolling division. The metal and casting divisions achieved good results, and we therefore maintain our positive outlook for the full year of 2011.

Some uncertainty as to further economic development is generated by the state of national finances, which in some cases is highly problematic, and potential problems in the banking sector that could arise in this context. With an equity ratio of approximately 57 % and a very low level of indebtedness, AMAG moreover has a very sound balance-sheet structure and is thus well prepared for any challenges to come as well as for pursuing the growth course we have charted for our future.

In September 2011, the start-up of the most modern and most flexible passivation line for automotive sheets worldwide was commenced. The investment strengthens AMAG's position and expands its delivery capacity in the transport division, which is seeing strong growth on the international level.

Within the framework of the current program aimed at increasing production capacity, improving product quality and securing sustainable production with a high portion of recycling materials, AMAG's Supervisory Board on 14 September 2011 approved further investments in the amount of 12 mEUR. These investments involve i.a. the expansion of a recycling center, allowing an even higher input of scrap materials as basis for our products. 55 mEUR out of the 75 mEUR that have been provided in order to increase capacity in the casting and rolling mills at the Ranshofen plant have already been, or are currently being, invested.

The assessment suggesting that the demand for aluminium will roughly double over the next 10 to 12 years is still intact. With growth forecasts having been slashed and with the lack of certainty concerning economic development prevailing in the wake of the European sovereign debt crisis, the outlook for 2012 is fraught with uncertainty. However, our broad product portfolio with its high proportion of special products and the ability to supply global markets, currently let us maintain our optimistic outlook for AMAG. It remains to be seen whether and how the debt crisis will affect the real economy.

Ranshofen, 4 November 2011

Interim Management Report

Course of business for the AMAG Group and economic environment

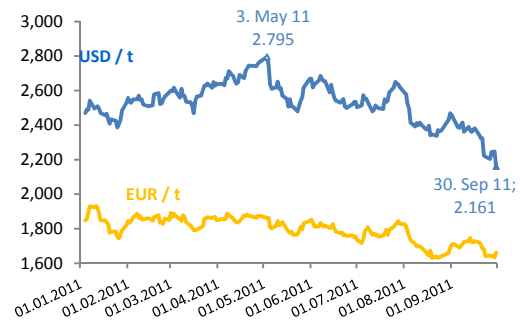

According to reports published by the German ifo¹, the outlook for macroeconomic developments has significantly changed for the worse in the summer months of 2011. Thus, the GDP is expected to increase in Germany by 2.9 % this year and only by 0.8 % next year. This development is driven by the aggravation of the European sovereign debt and confidence crisis. Against this backdrop, the operative business in the third quarter was characterized by continued satisfactory sales levels of primary aluminium, rolled products and recycling foundry alloys.

In a breakdown by country, the traditional European primary markets of Austria, Germany, Italy, France and the US dominated.

The aluminium price (3-month LME) went down in the third quarter of 2011 from a starting level of 2,504 USD/t in July to a level of 2,161 USD/t as of 30 September 2011. The highest price for the quarter was 2,650 USD/t, the lowest was 2,161 USD/t. The average price decreased from 2,619 USD/t in the second quarter to 2,430 USD/t in the third quarter.

In the first three quarters of 2011, the average price was at 2,525 USD/t, with a low of 2,161 USD/t at the end of the third quarter. Aluminium prices expressed in euros moved within a band of between 1,630 EUR/t and 1,930 EUR/t in the first three quarters, averaging 1,795 EUR/t.

Development of aluminium price in Q1-Q3 2011

Stocks kept in LME-registered warehouses continue to be at a high level, averaging 4.5 million tons (or about 10 % of the expected annual production). In the third quarter, stocks fluctuated between 4.4 and 4.7 million tons.

In the first three quarters of 2011, the sales of the AMAG Group were 627.6 mEUR, or 15 % higher than in the corresponding period of the prior year (547.7 mEUR). Sales in the third quarter of 2011 amounted to 198.4 mEUR and were thus roughly on the same level as in the prior year due to virtually unchanged shipment volumes.

The earnings before interest, taxes, depreciation and amortization (EBITDA) for the Group in the first three quarters were 124.6 mEUR; i.e. they were 16.4 mEUR (or 15 %) above the EBITDA for the comparable period in the prior year (108.2 mEUR). In the third quarter of 2011, the EBITDA was 42.7 mEUR, i.e., up 7.4 mEUR or approximately 21 % from the amount reported for the comparable period in the prior year.

EBIT increased by 22 % to 90.7 mEUR due to the trend of depreciation and amortization levels continuing virtually unchanged. Overproportional growth was achieved in the surplus for the period. Net income after taxes for the first three quarters of 2011 amounts to 75.9 mEUR, thus being up 29 % from the result generated in the comparable period of the prior year.

^{*)} The comparable values shown for the year 2010 refer to AMAG Holding GmbH and its subsidiaries

1) Shipments from Alouette only

2) Average full time equivalent including leasing personnel, without apprentices

The employees of the 20 % participation in smelter Alouette (approx. 200 employees) are not included

The worldwide production of primary aluminium in the first three quarters 2011 according to CRU¹ was about 34 million tons, as compared with 32 million tons in the comparable period of the prior year (+ 6.8 %). According to information from CRU, the consumption of primary aluminium rose from 31 million tons in the first three quarters of the prior year to 33 million tons (+ 9 %) as compared to the same period of the current year.

In the first three quarters of 2011, sales in the Metal Division were 446.4 mEUR after 381.6 mEUR in the comparable period of 2010, which translates to a 17 % increase.

The main reasons for this boost was the increase in average aluminium prices as well as the higher shipment volumes.

EBITDA rose from 24.8 mEUR to 26.4 mEUR as compared with the second quarter of 2011. Compared to the third quarter of 2010 a 131 % increase was reported.

Comparing the first three quarters with the same period of the prior year, EBITDA increased from 57.1 mEUR to 60.9 mEUR this year. In particular, the higher average aluminium price as well as effects from the valuation of hedging instruments as compared to the comparable period had a positive effect.

^{*)} The comparable values shown for the year 2010 refer to AMAG Holding GmbH and its subsidiaries

1) Average full time equivalent including leasing personnel, without apprentices

The business trend in the Casting Division is generally driven by the development of the automotive industry and its suppliers. Here, above all, the development of passenger car production in Germany is relevant, and this, according to the interim report of the VDA (*Verband der Automobilindustrie* or Automotive Industry Association) covering the first three quarters of the year grew by 7 % from a production level of approx. 4.1 million units in the first three quarters of 2010 to 4.4 million units produced in the same period of 2011. This includes an increase in exports from 3.1 to 3.4 million units (+ 8 %). A comparison of the third quarter of the prior year with the same period of the year under review shows an increase in production from 1.3 to 1.4 million units (+ 12 %) and of exports from 0.97 to 1.1 million units (+ 12 %).

The Casting Division's sales rose in comparison with the first three quarters of the prior year, from 84.1 mEUR in 2010 to 100.4 mEUR in 2011.

EBITDA increased from 4.7 mEUR to 6.6 mEUR, i.e. + 39 %, as compared with the same three quarters of the prior year. The decisive factors for this positive development as compared to the same nine-month-period of the prior year was the shift in the product mix to specialties and higher price levels.

On a quarter-to-quarter comparison, EBITDA at 1.9 mEUR was approx. on the prior year's level of 2.0 mEUR.

Rolling Division

| Key figures for the Rolling Division in mEUR | Q3/2011 | Q3/2010 ^{*)} | Change in % | Q1-Q3/2011 | Q1-Q3/2010 ^{*)} | Change in % | 2010 ^{*)} |
|---|---------|-----------------------|----------------|------------|--------------------------|----------------|--------------------|
| Sales | 129.0 | 132.0 | (2 %) | 426.4 | 372.5 | 14 % | 493.6 |
| of which internal | 14.6 | 13.4 | 9 % | 45.3 | 36.3 | 25 % | 53.1 |
| Shipments in tons | 34,622 | 39,073 | (11 %) | 114,409 | 115,268 | (1 %) | 148,435 |
| EBITDA | 13.5 | 19.9 | (32 %) | 54.5 | 42.9 | 27 % | 55.0 |
| EBIT | 9.9 | 16.6 | (40 %) | 43.9 | 32.9 | 33 % | 41.7 |
| Employees ¹⁾ | 1,009 | 962 | 5 % | 996 | 942 | 6 % | 947 |

^{*)} The comparable values shown for the year 2010 refer to AMAG Holding GmbH and its subsidiaries

¹⁾ Average full time equivalent including leasing personnel, without apprentices

The European market for aluminium rolled products¹ was mainly characterized by a strong increase in the demand for heat-treated plates - a specialty of AMAG - primarily from the aircraft industry as well as by stable demand from the German mechanical engineering industry. The demand from the automotive industry, especially in Germany, likewise stabilized at a high level. In contrast, demand from the construction industry remained weak, flattening particularly in Southern Europe, whereas the market in Eastern Europe, one of AMAG's growth regions, was marked by consistent growth.

In the North American market, the transport sector was the main driver of demand, and particularly the commercial vehicle and aircraft industries.

In Asia, the stable and strong demand for aluminium rolled products resulted from growing urbanization and the related growth of the automotive and construction industries.

The Rolling Division's sales rose by 14 % from 372.5 mEUR to 426.4 mEUR in the reporting period. In addition to higher aluminium prices and higher price levels this is also due to a shift in the product mix.

In the first three quarters, EBITDA increased from 42.9 mEUR to 54.5 mEUR, i.e. by + 27 %. In comparison with the same quarter of the prior year, EBITDA at 13.5 mEUR was below the prior year's level of 19.9 mEUR.

¹ CRU: Commodity Research Unit, August 2011

Reasons for this were unscheduled repair work on the craneways, damage caused by stormy weather and necessary maintenance work. The resulting prolonged down time in the third quarter 2011 led to a lower sales volume compared to the prior year.

Provisioning and foreign currency valuations also had a negative impact.

Service Division

| Key figures for the Service Division in mEUR | Q3/2011 | Q3/2010 ^{*)} | Change in % | Q1-Q3/2011 | Q1-Q3/2010 ^{*)} | Change in % | 2010 ^{*)} |

| EBITDA | 1.0 | 2.0 | (51 %) | 2.6 | 3.5 | (24 %) | 2.5 |
| EBIT | -0.8 | 0.3 | - | -2.4 | -1.6 | 57 % | -4.2 |
| Employees ¹⁾ | 112 | 110 | 2 % | 113 | 109 | 4 % | 109 |

^{*)} The comparable values shown for the year 2010 refer to AMAG Holding GmbH and its subsidiaries

1) Average full time equivalent including leasing personnel, without apprentices

The Service Division includes the holding of developed properties at the Ranshofen location and provides centrally-organized services, such as facility management, energy supply and various "shared services".

EBITDA was 2.6 mEUR in the first three quarters of 2011 after 3.5 mEUR in the comparable period of the prior year.

Outlook for 2011

The German ifo in its current assessment of the general economic situation expects that, after a dynamic start to the current year, growth will show a clear slackening in the second half of 2011. Thus, expectations for GDP growth in Germany have been revised downwards, to a decreased rate of 2.9 % for this year. An increase by only 0.8 % is expected for next year. In its current forecast, the German ifo in light of the above anticipates that in 2011 the gross domestic product (GDP) for the Eurozone will grow by 1.8 %.

The weakened business outlook, the controversial debates on sovereign debt limits in the United States and on the debt crisis in the Eurozone moreover led to tensions on the international financial markets.

However, the forecasts concerning the consumption of primary aluminium or aluminium rolled products have not changed fundamentally since the previous quarter. For primary aluminium, expectations within the sector are that consumption will rise by between 9 % and not more than 12 % in 2011.

The assessment suggesting that the demand for aluminium will roughly double over the next 10 to 12 years is still intact.

For the global consumption of rolled products, CRU continues to expect about 20 million tons (+8 %) for 2011 after 18.5 million tons in 2010.

Against this backdrop, and based on the satisfactory order backlog, AMAG expects that the positive business development will continue in the last quarter of 2011. Particularly on account of maintenance work scheduled at the Ranshofen location in August and December, a reduction in quantities shipped is to be expected for the second half-year.

The Management Board expects raw material costs in the Metal Division to continue on a high level in the 4th quarter of 2011. On the assumption that the price of aluminium will remain stable, the positive effects from valuation will no longer arise in the 4th quarter. AMAG's management nevertheless confirms the outlook for 2011 announced in the half-year results and from today's perspective still expects profitability for 2011 to increase beyond the record levels achieved in the prior year.

Risk management and significant risks in the fiscal year

The risk management of the AMAG Group is oriented toward securing sustained, positive growth in the asset, financial and earnings positions, as well as a long-term increase in the value of the Group as a whole.

The system is primarily based on

- the regulation of operating processes by means of group guidelines, in order to assure the recognition, analysis, valuation and communication of risks, and thus active control of the handling of risks and opportunities,
- active hedging of the specific risks (volatility of the price of aluminium and USD/CAD as well as USD/EUR),
- the covering of certain risks by means of insurance policies as part of a comprehensive insurance concept.

The significant risks in AMAG's business in the remaining part of the fiscal year are, in particular, in the general economic trend, and in the macroeconomic setting.

The resulting uncertainty in the market may lead to declining demand for cast and rolled aluminium products. Additionally, higher pressure on sales prices may have a negative effect on AMAG's sales and earnings positions. Similarly, any volatility in aluminium prices and in the USD/EUR and USD/CAD exchange rates as well as rising prices of the raw materials required for the smelter would have a delayed effect on AMAG's sales and earnings development. A comprehensive description of the risks may be found in the 2010 Consolidated Financial Statements of AMAG Holding GmbH.

Notes to the Interim Consolidated Financial Statements

General comments

AMAG Austria Metall AG (5282 Ranshofen, Lamprechtshausnerstraße 61, registry number FN 310593f at the Regional Court of Ried) is an Austrian holding company that, with its group affiliates, is engaged in the production and distribution of primary aluminium, rolled products (sheets and plates) and recycling foundry alloys.

Legal foundations and methods

The Interim Consolidated Financial Statements for the reporting period from 1 January to 30 September 2011 were prepared in accordance with IAS 34 Interim Financial Reporting. The Interim Consolidated Financial Statements do not include all information and data included in the Consolidated Financial Statements as of 31 December 2010 of AMAG Holding GmbH and should be read together with those.

Accounting methods used in the preparation of the Interim Consolidated Financial Statements correspond to those for the Consolidated Financial Statements as of 31 December 2010, and the valuation methods as of 31 December 2010 used in the AMAG Holding GmbH remain unchanged. The Interim Consolidated Financial Statements are reported in thousands of Euros. In adding rounded amounts and percentages, the use of automated calculations may result in rounding differences. Unless otherwise indicated, the comparable data refers to the third quarter of the 2010 fiscal year (closing date 30 September 2010) for AMAG Holding GmbH.

The Management Board of AMAG Austria Metall AG is persuaded that the Interim Consolidated Financial Statements represent a true and fair picture of the actual asset, financial, and earnings positions. The Interim Consolidated Financial Statements were subjected to neither a complete audit nor a review by an auditor.

Changes in the scope of consolidation

The Interim Consolidated Financial Statements for the comparable period in 2010 concern AMAG Holding GmbH and its subsidiaries. In the Interim Consolidated Financial Statements as of 30 September 2011, AMAG Austria Metall AG, AMAG Erste Beteiligungsverwaltungs GmbH and Sulipo Dritte Beteiligungsverwaltungs GmbH were included in the scope of consolidation, with AMAG Austria Metall AG serving as the controlling company of the AMAG Group now.

Accounting standards

With respect to the restructuring measures carried out in the first half-year of 2011, these are mergers of companies under common control ("Transactions under common control") according to IFRS 3. Such restructuring measures do not fall under the scope of application of IFRS 3, nor are they governed by other IFRSs. To the extent that processes are not governed by IFRS, IAS 8.10-12 offers references to further handling, according to which, in the absence of a standard, management must decide which accounting and valuation method represents a true and fair picture of the economic content of the factual relationships.

On this basis, the AMAG management has determined an accounting method according to which, for restructuring measures of companies under common control, the book values of the existing AMAG IFRS Consolidated Financial Statements form the basis for accounting for the restructuring measures. In this manner, no revaluation to the current market values is performed and consequently no differential amounts (goodwill) result from the restructuring measures.

With respect to the IFRS accounting standards used, no changes occurred as compared with the Consolidated Financial Statements of AMAG Holding GmbH as of 31 December 2010.

Seasonal and cyclical fluctuations

The course of business for AMAG Austria Metall AG is not generally characterized by substantial seasonal fluctuations. Also in 2011, the scheduled annual maintenance measures at the Ranshofen location will be performed in the second half-year.

Notes to the Consolidated Balance Sheet

As of 30 September 2011, the balance sheet total for the AMAG Group rose to 920.8 mEUR (31 December 2010: 828.8 mEUR).

Property, plant and equipment decreased from 388.3 mEUR to 381.9 mEUR. In addition to negative currency differences due to USD/EUR conversion, depreciations exceeding the asset additions of the period also contributed to this decrease.

Other receivables decreased from 108.9 mEUR as of 31 December 2010 to 62.2 mEUR as of 30 September 2011 primarily due to the dissolution in March 2011 of the cash pooling relationship with the Constantia Packaging Group. Because of this return flow and on account of the capital injections made in the first half-year, cash and cash equivalents of the AMAG Group increased from 9.1 mEUR to 112.7 mEUR.

Non-current interest-bearing financial liabilities rose from 21.8 mEUR to 58.2 mEUR. The main reason for this increase was the conclusion of a loan agreement under which an amount of 40.0 mEUR becomes due and payable after more than one year.

Equity (including non-controlling shares) was increased from 514.2 mEUR by 9.0 mEUR to 523.2 mEUR. The change resulted in particular from a profit distribution of 200.0 mEUR, from a capital increase in February 2011 in the amount of 29.9 mEUR, a capital injection of 95.0 mEUR made in connection with the IPO as well as income and expenses in the amount of 84.0 mEUR in the first three quarters.

In connection with the IPO, on 8 April 2011, 19.3 million shares of AMAG Austria Metall AG were placed with institutional investors and Austrian private investors. This included an increase of the capital stock of AMAG Austria Metall AG by 5,264,000 shares. Simultaneously with the IPO, the AMAG Employees Private Foundation ceased to be a shareholder in Austria Metall GmbH and became a shareholder in AMAG Austria Metall AG. This transaction was reported at book values according to IAS 27.31.

Notes to the Consolidated Statement of Income

From January to September 2011, the sales of the AMAG Group were 627.6 mEUR, or 15 % higher than in the corresponding period of the prior year (547.7 mEUR). Sales in the third quarter of 2011 amounted to 198.4 mEUR, thus exceeding the sales of the third quarter of 2010 by 3 % due to the shipment volume continuing virtually on the same level.

The earnings before interest, taxes, depreciation and amortization (EBITDA) for the Group in the first three quarters were 124.6 mEUR; i.e. they were 16.4 mEUR or 15 % above the EBITDA for the comparable period in the prior year (108.2 mEUR). In the third quarter of 2011, the EBITDA was 42.7 mEUR, i.e., up 7.4 mEUR or approximately 21 % from the amount reported for the comparable period in the prior year.

EBIT increased by 22 % to 90.7 mEUR due to the trend of depreciation and amortization levels continuing virtually unchanged. Overproportional growth was achieved in the surplus for the period. Net income after taxes for the first three quarters of 2011 amounts to 75.9 mEUR, thus being up 29 % from the result generated in the comparable period of the prior year.

Notes to the Consolidated Cash Flow Statement

In the first three quarters of 2011, the cash flow from operating activities was 77.3 mEUR, or 11.0 mEUR up from the comparable value for 2010 of 66.3 mEUR. This increase is primarily due to the higher earnings achieved in the current fiscal year. The cash flow from operating activities generated in the third quarter of 2011 was 21.5 mEUR, or approximately 3.6 mEUR below the comparable value of the prior year. A significant contributor to this trend was in particular the negative development concerning the working capital.

At -29.6 mEUR (Q3 2011: -12.9 mEUR), the cash flow from investing activities generated in the first nine months of the current year was higher than in the comparable period of the prior year at -26.9 mEUR (Q3 2010: -9.8 mEUR) due to increased investment activities. Most of the funds were invested in replacement and extension projects at the Ranshofen location, and approximately one third of the investments is attributable to the Canadian smelter.

Business relationships with affiliated companies

Balances and transactions between AMAG Austria Metall AG and its subsidiaries were eliminated as part of the consolidation and are not further explained here.

Within the scope of the business operations, there are business relationships for the provision of goods and services with affiliated companies within the AMAG Group. These transactions take place exclusively at market conditions.

There were no fundamental changes in transactions with affiliated companies and persons as represented in the Consolidated Financial Statements of AMAG Holding GmbH as of 31 December 2010 and that significantly influenced the company's financial position or operating profit/loss during the first nine months of the current fiscal year.

No loans were granted to members of the Management Board or Supervisory Board, nor were liabilities entered into on their behalf. No other types of transactions, particularly purchase agreements for significant assets, were concluded.

Significant events after the balance sheet date

On 18 October 2011, financial liabilities in the amount of 40.0 mEUR were repaid.

AMAG announced on 31 October 2011 that representatives of the Alouette smelter, in which AMAG holds a 20 % share, and of the Quebec Government signed a Memorandum of Understanding (MoU) in Sept Îles concerning the supply of electric power to the smelter. The agreement fixes the key terms for purchasing electricity until 2041. The next step will be the signing of an electricity supply contract on the basis of the MoU.

Statement by the Management Board

We confirm that, to the best of our knowledge, the Interim Consolidated Financial Statements prepared in accordance with the regulations for interim financial statements of the International Financial Reporting Standards (IFRS) represent a true and fair picture of the asset, financial and earnings positions of AMAG Austria Metall AG.

We furthermore confirm that the interim consolidated management report represents a true and fair picture of the asset, financial and earnings position of AMAG Austria Metall AG in respect of the major events during the first nine months of the fiscal year and their effect on the Interim Consolidated Financial Statements, of the significant risks and uncertainties in the remaining three months of the fiscal year, and of the transactions to be disclosed as significant transactions with affiliated companies and persons.
